Abstract (en)

[origin: CN115399547A] A sole structure for an article of footwear having an upper includes a cushioning member and a base. The cushioning member includes a first series of lobes alternating with the first series of recesses along a length of the cushioning member. The first series of lobes and the first series of recesses extend along one of a medial side of the sole structure and a lateral side of the sole structure. The base is disposed between the cushioning member and the upper and includes a series of first supports alternating with the second series of recesses. The supports in the first series of supports are aligned and in contact with corresponding lobes in the first series of lobes, and the second series of recesses are aligned with the first series of recesses.
