Abstract (en)
[origin: WO2022254346A1] External fixing system (1) for an orthopaedic exoskeleton; the fixing system (1) comprises two clamps (2, 6), which have four clamping seats (5, 9, 23, 24) and respective knurls (13, 14) facing each other, and a locking assembly (11) for pushing the clamps (2, 6) against each other so that their relative rotation is prevented by the coupling of the two knurls (13, 14); the system (1) is capable of fixing support elements of different sizes.
