Abstract (en)
[origin: WO2022248794A1] The invention relates to a device (100) for phototherapy treatment of a user's face, comprising a mask (10) provided with a frame defining a front face directed towards a user's face, and with an opposite back face, the frame (12) supporting a plurality of light-emitting points of light (22) arranged in the mask (10) in order to produce energetic illumination of the user's face through the front face, and a support (200) for holding the mask (10), characterised in that the support (200) comprises a base (210) and a self-supporting flexible tube (220) which allows the orientation of the mask (10) to be changed while supporting it, and which can be deformed along a curvilinear path while providing a support function.
