Abstract (en)
[origin: WO2022256036A1] Disclosed herein are containers. Also disclosed are methods using the containers and methods of storing substances in containers. The containers suitably have a glass base and a plastic cap and provide for child-resistant containers. A user can releasably remove the cap from base. For example, the user squeezes opposite corners of the container cap, which releases a locking mechanism and allows for removal of the cap by lifting or pulling the container cap off from the container base.
