Abstract (en)

[origin: WO2022248623A1] The present invention relates to the field of biopharmaceutical manufacturing, in particular that of protein production. More specifically, the present invention relates to a modular cell-based production system designed for the production of monoclonal antibodies and other therapeutic proteins. The invention further relates to a perfusion bioreactor, in particular a fully continuous and integrated bioprocess designed for the production of monoclonal antibodies and other therapeutic proteins.
