Abstract (en)
[origin: WO2022248338A1] Spacer (10) for insulating glazing units at least comprising - a U-shaped polymeric main body (1), which extends in the longitudinal direction (X) and at least comprising a first member (2.1), with a first pane-contact surface (7.1), a second member (2.2), with a second pane-contact surface (7.2), and an outer surface (9), by way of which the first pane-contact surface (7.1) and the second pane-contact surface (7.2) are connected to one another, - a polymeric covering sheet (5), which extends in the transverse direction (Y), parallel to the outer surface (9), between the first pane-contact surface (7.1) and the second pane-contact surface (7.2), wherein - the covering sheet (5) and the U-shaped polymeric main body (1) enclose a cavity (11), and - the polymeric covering sheet (5) is connected to the first member (2.1) and the second member (2.2) of the U-shaped polymeric main body (1), in each case by means of a form-fitting mortise and tenon connection.
