Abstract (en)

[origin: WO2022253547A1] There is described a cooking hob (1) for the thermal treatment of food products comprising at least one or more cooking zones (2) configured to support a cooking vessel and to heat the cooking vessel and/or a food product present within the cooking vessel and a vapor generation device (3) for thermally treating food products by means of a vapor. The vapor generation device (3) comprises at least a steam generator (15) configured to generate the vapor, a water tank (16) configured to store water; and a coupling assembly (17) configured to releasably carry and/or releasably carrying the water tank (16) and to direct the water to a vapor generation station at which the steam generator (15) is configured to generate the vapor from the water.
