Abstract (en)

The present invention falls within the technical field of storage using containers, preferably cardboard containers. In a particular embodiment, said containers are intended for packaging food products, available in a variety of shapes and sizes, depending on the products to be packaged. In particular, the present invention relates to a container for packaging products. Said container is obtained from the folding at various points and the attachment to one another of elements of an extended flat sheet, particularly made of cardboard, which after its assembly configures said product packaging container.
