Abstract (en)

The present invention relates to a package (1) for liquid foodstuffs. The package (1) comprises: flexible walls (2) defining a chamber configured to house the liquid foodstuffs; a tab (4) formed by the flexible walls (2), wherein the tab (4) is separable from the package (1) for opening thereof and configured to remain connected to the package (1) after opening thereof; and wherein the tab (4), when separated from the package (1), is attachable to the package (1) in a deflected position.
