Abstract (en)

This application discloses a control method and apparatus, an electronic device, and a readable storage medium, and pertains to the field of computer technologies. The control method includes: displaying a first widget of a first application program, where the first widget is associated with target functions of at least two application programs; receiving a first input performed by a user on a target control of the first widget; and performing target processing corresponding to the target control on N application programs in response to the first input; where the N application programs include the first application program, and N is an integer greater than 1.
