Abstract (en)  
The disclosure relates to a removable protector for a headband of a set of headphones, wherein the protector is a hollow elongated tubular structure comprised of a first end portion, a second end portion, and a middle portion lying therebetween, characterized in that the first end portion and the second end portion are elastic and stretchable. The advantage of the disclosed invention is that it can be positioned on the headband of the headphones without disassembling the headphones or opening and closing the protector. The protector protects the hair of the headphones user from pulling and entanglement.
