Abstract (en)

[origin: WO2022261323A1] A sole structure for an article of footwear includes a bladder assembly having a first fluid-filled chamber spaced apart from a second fluid-filled chamber and a chassis. The chassis includes a plate. The plate has a bottom surface configured to accommodate the first fluid-filled chamber and the second fluid-filled chamber. The chassis further includes a shank configured to be seated to a mid-foot portion of the bottom surface of the plate and separate the first fluid-filled chamber from the second fluid filled chamber.
