Abstract (en)

[origin: WO2022258808A1] According to a first aspect, the invention relates to a composition selected from detergents and cleaning agents and cosmetic compositions, said composition containing biodegradable microcapsules comprising a core material and a shell, the shell consisting of at least one barrier layer and one stability layer, the barrier layer surrounding the core material, the stability layer comprising at least one biopolymer and being located on the outer surface of the barrier layer, and an emulsion stabiliser being located at the transition between the barrier layer and the stability layer. The invention also relates to the use of said composition.
