Abstract (en)
[origin: WO2022258931A1] A foldable container (1, 1', 1'') configured to contain objects when it is unfolded (1', 1''), the foldable container (1, 1', 1'') comprising a support wall (2), the support wall (2) comprising four sides in a plane of the support wall (2), the foldable container (1, 1', 1'') further comprising four side walls (31, 32, 33, 34), each of the side walls (31, 32, 33, 34) being mounted by one side of the side wall (31, 32, 33, 34) to one side of the support wall (2), such that the side wall (31, 32, 33, 34) pivots about an axis defined by the side of the support wall (2), in order to move from a folded configuration of the side wall (31, 32, 33, 34), wherein a plane of the side wall (31, 32, 33, 34) is parallel to the plane of the support wall (2), to an unfolded configuration of the side wall (31, 32, 33, 34), wherein the plane of the side wall (31, 32, 33, 34) is transverse to the plane of the support wall (2), such that the foldable container is folded (1) when the four side walls (31, 32, 33, 34) are folded, and the foldable container (1', 1'') is unfolded when the four side walls (31, 32, 33, 34) are unfolded.
