Abstract (en)
[origin: WO2022260521A1] The invention relates to a wave energy converter, comprising at least one moveable floating body; at least three connections, for connecting the floating body to a fixed or floating world, wherein first sides of the three connections engage at at least three separate locations on the floating body, and wherein second sides of the three connections engage, either directly or indirectly, on the fixed or floating world; and at least one energy converting unit, wherein the at least three connections allow the moveable floating body the freedom to move in at least one substantially vertical direction.
