Abstract (en)

[origin: WO2022258544A1] Embodiments of the disclosure relate to a motor assembly. The motor assembly comprises a motor part (12); a driver (16) adapted to be electrically connected to the motor part (12) and to drive the motor part (12); and a motor seat plate (14) configured to support the motor part (12) and to divide space in the motor assembly into a first cavity (50) communicating with the atmosphere and a sealed second cavity (60), wherein the motor part (12) is installed in the first cavity (50), and the driver (16) is installed in the second cavity (60), and wherein the motor seat plate (14) comprises a sealed connection arrangement for hermetically and electrically connecting a wire of the motor part (12) to the driver (16).
