Abstract (en)
The present invention relates to a system and method for mooring of and supply of fluid or mooring of and supply of fluid and supply electrical power to a vessel, the system comprising a mooring buoy, a mooring connection being a combined mooring and power source connection by comprising a mooring line and a fluid pipe or the mooring line, the fluid pipe and an electric conductive cable for supply of said electrical power and a retractable vessel connector provided at an end of the mooring connection, wherein the vessel connector is a combined mooring connector and a fluid connector or a combined mooring connector, fluid connector and electrical connector. The system further comprising or involves a gripping device arranged on a vessel wherein the gripping device is configured to grip and lock said vessel connector to moor said vessel to said mooring buoy.
