Abstract (en)

[origin: WO2024051902A1] The invention relates to a device for leading an animal (1), in particular a dog or a horse, by two people, comprising a first leash (4), wherein a first free end (5) of the first leash (4) can be connected to a collar, a harness or a halter, wherein a second free end (6) of the first leash (4) has a handle region for a first person, wherein a second leash (7) is connected to the first leash (4) in such a manner that if a defined pulling force is exceeded, the connection between the first leash (4) and second leash (7) is released. The invention also relates to a leash for leading an animal (1).
