Abstract (en)

[origin: WO2022263775A1] - The invention relates to a portable hairstyling appliance (1) comprising means for generating a stream of air according to at least two different blowing modes corresponding to different paths of the stream of air within the appliance. Said appliance comprises a control mechanism (19) having a push-push button (20) to control each switching of the apparatus from one of said blowing modes to another of said blowing modes. - Hairstyling appliances.
