Abstract (en)
[origin: WO2022263087A1] The invention relates to a transverse sealing unit (09) for producing transverse sealing seams in a tubular bag machine (01), wherein: the transverse sealing unit (09) comprises at least one sealing bar (11), at least one active surface of which comes to bear sealingly against the film tube (05) during transverse sealing; the transverse sealing unit (09) comprises a carrier element (12) in which the sealing bar (11) is fastened; the sealing bar has at least two active surface sections (13, 14, 15); the first active surface section (15) projects slightly beyond the second active surface section (13, 14); and the sealing bar (11) is mounted on the carrier element (12) so as to be adjustable in the direction of the longitudinal axis of the sealing bar.
