Abstract (en)

[origin: WO2023194589A1] Container closure made of metal, with a sealing insert arranged in the container closure in such a way that it makes contact with the mouth of the container when the container closure is arranged on the container, wherein the sealing insert comprises or consists of a sealing compound which contains, relative to the total weight of the sealing compound, at least 10% by weight, preferably at least 40% by weight, of LDPE, in particular with butene, hexene or octene as comonomer, in addition to contents of LLDPE and/or OBC, and a content of more than 2% by weight of at least one oxygen-absorbing compound, preferably sodium sulfite.
