Abstract (en)

[origin: WO2023237255A1] The invention relates to a stack insertion means (09) having rotationally drivable support rollers (10) for sheets to be picked up, which support rollers extend over the width of the stack insertion means (09), and having a box-like reinforced tip which is mounted upstream of the support rollers (10) in the insertion direction (T). The box-like reinforced tip is designed as a box profile (11) through which a plurality of rollers (12) pass.
