Abstract (en)
[origin: WO2022263609A1] The invention relates to a hydrocarbon fluid comprising 75 to 95% by weight of isoparaffins and less than 500 ppm by weight of aromatics relative to the total weight of the hydrocarbon fluid, the fluid having an initial boiling point and a final boiling point of between 120 and 240°C, and a flash point below 90°C. The invention also relates to the use of the hydrocarbon fluid, according to the invention, as a solvent, for example in a paint, material coating, material treatment, mastic, polymerisation, aerosol, cleaning or water treatment composition.
