Abstract (en)

[origin: WO2022263356A1] A method of commissioning physical HVAC devices (Cx) for an HVAC application, the method comprising: communicatively connecting physical HVAC devices (Cx) to a communication bus (40), one physical HVAC device (Cx) being selected as master HVAC device (Cmaster); identifying the physical HVAC devices (Cx) connected to the 5 communication bus (40); determining device type(s) of the physical HVAC devices (Cx); receiving, an application model comprising a device list listing virtual HVAC devices of an HVAC application; generating, by the master HVAC device (Cmaster), a mapping of the physical HVAC devices (Cx) to the virtual HVAC devices using the device type(s) of the physical HVAC devices (Cx) and of the virtual HVAC devices.
