Abstract (en)

[origin: WO2022263786A1] The optical device (1) allows information visible by the eye of a user to be projected and is devoid of means for capturing a video stream, the optical device (1) being intended to be worn by a user and comprising audio-stream-capturing means, a display system (5) and an optical assembly (6) that is intended to focus a content displayed on the display system (5) so as to form an image. The optical device (1) also comprises a control unit (12) configured to collect an audio stream using the audio-stream-capturing means, to obtain a set of visual data on the basis of the collected audio stream, and to display the visual data in the form of an image on the display system (5).
