Abstract (en)  
[origin: WO2023030757A1] The invention relates to a method (100) for monitoring working machines (10, 12), wherein different components of a software are carried out (120) using different working machines (10, 12). Furthermore, data is stored (140) in the process which correlates to a work progress of at least one of the aforementioned working machines (10, 12). At least some of the stored data is also evaluated (200) using one of the aforementioned working machines (10, 12).
