Abstract (en)
[origin: WO2022263554A1] The invention relates to a method for providing hyperparameters for producing artificial images, comprising: - creating an initial hyperparameter set; - creating an initial image data set; - producing an image data set by means of an image-optimized method in accordance with the hyperparameter set; - checking the produced image data set for a predefined termination criterion; - adjusting the hyperparameter set; and - carrying out the image-optimized method again with changed hyperparameters, if the check shows that the termination criterion is not satisfied; or - providing the adjusted hyperparameter set as a first hyperparameter set, if the check shows that the termination criterion is satisfied.
