Abstract (en)  
[origin: WO2022266537A1] A computer-aided method of educating a plurality of music students in an ensemble, including: (i) receiving search parameters from a client device for searching a multidimensional database of songs, the multidimensional database of songs being compiled to include dimensions of at least (a) instrument parts which indicate a music component being played by a particular type of instrument, (b) educational concepts present, (c) one or more proficiency levels for each of the instrument parts; (ii) searching the multidimensional database of songs to retrieve one or more songs that match the received search parameters, the one or more songs being songs that match proficiency levels of the plurality of music students in the ensemble; (iii) receiving an indication from the client device of a selected song in the one or more songs; and (iv) providing to the client device method books associated with educational concepts of the selected song.
