Abstract (en)

The present patent application discloses an articulated mount for securing an outboard motor to water vessels, pertaining to the field of articles for watercraft or for steering watercraft, for use more specifically for attaching an outboard motor to watercraft in general; the subject matter of the present application comprises two high-strength rigid structures (2), consisting of metal tubes reinforced with metal plates, which are attached to the rear portions of the sides of the vessel (3) or to the rear corners by means of bushings (4), the lower portion of each rigid frame having a flotation buoy (5).
