Abstract (en)
Described is a hinge for doors of household appliances, comprising a box-shaped element (6) extending longitudinally along a first predetermined direction (D1) and having a U-shaped transversal cross-section, a first lever (5) pivoted on the box-shaped element (6) by means of a pivot (7), one between the box-shaped element (6) and the first lever (5) being fixable to a frame (2) and the other being fixable to a door (3), to make the door (3) movable in a tilting fashion relative to the frame (2) between a closed position and an open position.
