Abstract (en)
The invention relates to a lighting assembly (10) for a firearm (1), the lighting assembly (10) comprising:- a housing (12) with an interior (23);- a light source (24), wherein the light source (24) is received in the interior (23) of the housing (12);- a first switch (29), which is used for switching the light source (24) on and off;- a second switch (30), which is used for switching the light source (24) on and off;- a first actuating element receptacle (32) for receiving a first actuating element (31), which is used for actuating the first switch (29);- a second actuating element receptacle (34) for receiving a second actuating element (33), which is used for actuating the second switch (30).The first actuating element (31) may be designed in the form of a first pressing actuator (37) or in the form of a first rocking actuator (36). The second actuating element (33) may be designed in the form of a second pressing actuator (39) or in the form of a second rocking actuator (40).
