Abstract (en)

[origin: WO2022269242A1] A device is provided for processing food, comprising: a drive outlet on an underside of the device for mounting a processing tool; at least one light source located adjacent to the drive outlet so as to provide downward illumination from the underside of the device; and a cover; wherein the cover is arranged to seal the at least one light source within the housing and to transmit light. Other inventions are also disclosed.
