Abstract (en)  
[origin: WO2022268441A1] The present invention relates to an injection cartridge for a needle-free injection system, comprising: a propellant charge chamber containing a propellant powder; a liquid chamber containing an injection liquid; a percussion cap for igniting the propellant powder; a mobile applicator that can be accelerated to expel the injection liquid upon ignition of the propellant powder; and a housing in which the propellant charge chamber, the liquid chamber, the percussion cap and the applicator are accommodated.
