Abstract (en)
[origin: WO2022268921A1] The invention relates to a method for detecting deviations of extension of decorations on printed decorative papers, the method comprising the following steps: providing the printed decorative paper on a sample table, projecting a target original onto the sample table and the printed decorative paper such that a distance between at least two predefined original elements of the projected target original corresponds to a target distance between at least two predefined decorative elements of the decoration, determining deviations between the actual distance of the decorative elements and the distance between the projected original elements.
