Abstract (en)

[origin: WO2022269154A1] The invention relates to a head-up display device (1), comprising a housing including a front wall (11), a rear wall and two opposing side walls connecting the side edges of the front wall (11) and the rear wall, and a covering wall (15), each of said walls including an upper edge (110, 120, 130, 140), - the covering wall (15) being connected to the upper edges of the front, rear and side walls so as to cover the internal cavity of the housing (10), - wherein said walls each include a lower edge opposite their upper edge, and at least one of the front (11), and/or rear and/or side walls comprises a frangible portion (55) arranged so as to allow the covering wall (15) to be moved closer to one of the lower edges by breaking said frangible portion.
