Abstract (en)

[origin: WO2022268766A1] The invention relates to a handrail (1) for moving walkways, escalators or the like, which handrail can be mounted on a guide element. The handrail comprises: a base (4) which is located or can be located on the guide element; and a surface structure (5) which has at least one adhesive layer (3) and a top layer (2), wherein the handrail (1) has a substantially consistent cross-section along its profile direction, wherein the materials of the top layer (2) and the adhesive layer (3) differ, and wherein the surface structure (5) having the adhesive layer (3) is attached to the base (4).
