Abstract (en)
[origin: WO2022268719A1] The invention relates to a transport apparatus (105), a lining machine (20), a system (10) and a method for operating such a system, the lining machine comprising a base frame (85), a rail group (90), a feed apparatus (95), a lift apparatus (110) and a working platform (100), the rail group (90) being mechanically fastened to the base frame (85) and the rail group (90) having at least one rail arrangement (150). The lift apparatus (110) has a roller carriage (220) and a lift unit (225) located on the roller carriage (220), the roller carriage (220) being provided on the rail arrangement (150) so as to be movable between an installation position and an operating position. The lift unit (225) is connected to the working platform (100) and is designed to lower the working platform (100) into the converter (35) via the converter opening (45), and the feed apparatus (95) has a roller conveyor (215), one end of which ends at the lift apparatus (110).
