Abstract (en)
[origin: WO2022269402A1] Decorative panel (1) with a thermoplastic substrate (16) or with a substrate that comprises one or more layers that expand under the influence of temperature, with a decorative layer (18) on one side and with mechanical coupling parts (6, 7) on a first pair of opposite edges (2, 3). The panel comprises, on this pair of edges, a first, second, third and fourth sealing face (11, 12, 13, 14), all substantially perpendicular to the panel. The third sealing face (13) is under the first sealing face (11); and the fourth sealing face (14) is under the second sealing face (12). On coupling two such panels, the first and the second sealing faces abut against each other and the third and fourth sealing faces abut against each other.
