Abstract (en)  
[origin: WO2022269126A1] Devices, methods and computer programs for adapting a small data transmission are disclosed. An SDT adaptation parameter is received at a client device (200) from a network node device (210) during an ongoing small data transmission, SDT, procedure with the network node device (210). The client device (200) determines a preconfigured SDT adaptation operation associated with the received SDT adaptation parameter, and the client device (200) adapts the ongoing SDT procedure in accordance with the determined SDT adaptation operation.
