Abstract (en)  
An object of the present invention is to provide a polyolefin-based film that is excellent in withstand voltage characteristics and reliability in high-temperature environments and is suitable for use in, for example, capacitors to be used at high temperatures and high voltages, and a main object is to provide a polyolefin-based film that includes a layer A including a cycloolefin-based resin and a polypropylene-based resin and has a total light transmittance of 85% or more and an internal haze of 4.0% or less.
