Abstract (en)

[origin: WO2023275445A1] The invention relates to an applicator device for applying a product of the fluid or pasty type to keratin fibres or to an epidermis, comprising a central core of elongate shape, which extends along a longitudinal axis XX, at least one row of elongate spikes (3) comprising a first end (30) embedded in the core and a second, free end (20), the spikes (3) and the core (2) being formed in one piece, at least one of the spikes being delimited by a first flat face (200) coincident with a longitudinal plane passing through the longitudinal axis XX of the central core, referred to as the joint face, and by a second flat face (210) that forms, with the first flat face (200), an angle (211) of between 91° and 179°, delimiting a cosmetic product reservoir volume V.
