Abstract (en)  
[origin: WO2023274819A1] The present invention relates to a composite material which is suitable both for mechanical filtration and for chemical/selective binding/repulsion/exclusion of substances from solutions. The present invention also relates to the use of the composite material as a filtration membrane. The present invention is therefore also directed to a filtration membrane which comprises a composite material according to the invention and to the use of the filtration membrane for purifying liquids and/or for separating substances from liquids and/or for removing bacteria or viruses from liquids.
