Abstract (en)

[origin: WO2023275364A1] The invention relates to a packaging bag receiving apparatus for a packaging machine for receiving a plurality of packaging bags, comprising: a plurality of holder pairs for holding one packaging bag in each case, wherein each holder pair comprises a first holder and a second holder at a predetermined distance from said first holder, and wherein at least the first holder of a holder pair is movable with respect to the second holder of this holder pair; and a distance setting device for substantially simultaneous or synchronous setting of the distances between the holders of each holder pair by moving at least the first holder relative to the second holder of each holder pair.
