Abstract (en)

[origin: WO2023274662A1] The invention relates to a method (500) for placing a partition cohort of a microfluidic, in particular biological sample in partitions (110, 120) on a partition surface (101), in particular to determine a concentration of an analyte in the sample. The invention further relates to an analysis method (600) for detection of an analyte in a microfluidic sample and to a method (700) for preparing a partition cohort of a microfluidic sample.
