Abstract (en)

[origin: CN218175387U] The utility model relates to a clothes care device (136) which comprises a steam plate (100) comprising a steam outlet (110), the steam plate is provided with a given first area (S1) internally connected in a first peripheral boundary (PB1) of the steam plate, and an accessory (104) which comprises a retaining device (108) suitable for retaining a pad (106) containing a compound, the retaining device comprises an outer cover (128), and the outer cover (128) is used for covering the first area (S1) and the second area (S1). And an outer cover extending substantially parallel to the steam plate, the outer cover having a given second area (S2) defined as a pure area inscribed within a second peripheral boundary (PB2) of the outer cover, the second peripheral boundary being within the first peripheral boundary (PB1) of the steam plate, the second peripheral boundary being defined as a non-pure area inscribed within the first peripheral boundary (PB1) of the steam plate, and the second peripheral boundary being defined as a non-pure area inscribed within the second peripheral boundary (PB1) of the steam plate. Wherein the ratio of the second region to the first region is [30; 80]%.
