Abstract (en)
[origin: WO2023232181A1] The invention relates to a locking bar arrangement, in particular a plastic locking bar arrangement, for locking a door leaf (101) on a door frame (102), the locking bar arrangement comprising at least one bar (2) which can be arranged on the door-leaf side, the bar being arranged so as to be movable back and forth between a locked position (V), in which the rod (2) is locked at a catch (4) which can be arranged on the door-frame side, and an open position (0), in which the bar (2) is released from the catch (4). The movements of the bar (2) are guided via a bar guide (5) which can be arranged on the door-leaf side, the catch (4) and the bar guide (5) having a centering (6) comprising two centering bevels (7, 8) for aligning the closed door leaf (101) with respect to the door frame (102). Either one of the centering bevels can be used for doors (100) which are fitted on the left and the other centering bevel can be used for doors (100) which are fitted on the right.
