Abstract (en)
[origin: WO2023275184A1] The present invention relates to a movement for a timepiece comprising a counting assembly (10) comprising a first energy source (14) and a gear train (16) kinematically linked to at least one time indicator; and a control assembly (11) comprising a control member (35). This timepiece movement is characterised in that it further comprises a blocking member (56) for said gear train (16); a mobile unit (33) supporting said control assembly (11); a guide assembly (12) for said mobile unit (33), comprising at least one rail (30, 32); a drive mechanism for said mobile unit (33) which is arranged to move this mobile unit along the guide assembly (12); and a release mechanism (13) for said blocking member (56). The invention also relates to a timepiece containing such a movement.
