Abstract (en)

[origin: WO2023275012A1] The invention relates to a method for processing large volumes of data, so-called big data, by means of different computing architectures and arithmetics. In said process, distributed and heterogeneous data sources can be used. The invention is also directed to a correspondingly set-up system arrangement. Also disclosed is a computer program product with control commands which implement the disclosed method and operate the disclosed device and arrangement.
