Abstract (en)

[origin: WO2023274799A1] The invention relates to an emergency exit luminaire (1), comprising: - a planar light-guiding element (2) and - illuminants (3) arranged on a narrow side of the light-guiding element (2) which forms a light input coupling side (23) of the light-guiding element (2), with the light-guiding element (2) being designed to emit the light output by the illuminants (3) and radiated in via the light input coupling side (23) via at least one flat side (21) arranged substantially perpendicular to the light input coupling side (23), and with an escape path symbol (6) being provided on the flat side (21) of the light-guiding element provided for light output, and the escape path symbol (6) being applied to, preferably printed on, a pictogram film (4) which is fastened to the light-guiding element (2) so as to face the light-guiding element (2) with its surface containing the escape path symbol (6) and fastened in such a frame-like manner that the escape path symbol (6) is accommodated sealed between the pictogram film (4) and the light-guiding element (2).
