Abstract (en)

[origin: WO2023275490A1] The invention relates to a method for processing a connection between user equipment and remote equipment in a communication network, the user equipment being attached to a wireless access network of the communication network via a wireless link, the method comprising: - detecting (71) an under-utilisation of a data rate allocated to the connection over the wireless link; - obtaining (73) padding data, the data being stored in a memory (CDN_EC) accessible within the communication network; and - transmitting (74) the padding data thus obtained over the wireless link.
